

6-22-71

Dear Ken,

Those Who Received Water On The Spring Creek System For The 1971 Season

All water before ~~##~~ April 19, 1971 was used by Max Bailey and Melvin Dalton. Quantity unknown.

April 19 there was approx. 1.0 sec ft in Spring Creek, split was .54 to Max Bailey and .44 to Melvin Dalton. They took this and a varied amount until on or just before May 7. When I checked on this date all water was going past above diversions and approx. 1.25 was split between Carlisle and the Pete Bailey filings. After this date, May 7, most of the spring creek water was split between Carlisle and Pete Bailey. However at various times both Max Bailey and Melvin Dalton did take water.

Except for a possible trip up to the North Creek diversion the irrigation season in this area is about over. It was my understanding that I would not have to wait to be paid as I have in the past. Some of these people will pay now and some will not. I don't think I should have to wait. Enclosed is my bill for services, mileage and making this report. Will you please pass this on to the proper persons?

Thank you
Donald Rogers

Don
